Education

London School of Economics and Political Science, MPA in Data Science for Public Policy — 2025 - 2027
- On track for Distinction; Artificial Intelligence: 78; Data Science for Public Policy: 74; Political Science for Public Policy: 72; Topics in Model-Based Quantitative Analysis: 71.

London School of Economics (LSE), MSc Political Science (Conflict Studies and Comparative Politics) — 2024 - 2025
- Distinction; Quantitative Analysis for Political Science: 78.
- Dissertation: tested bellicist state-formation theory using cross-national regressions and an Iran case study.

University of Oxford, Lincoln College, BA Philosophy, Politics and Economics — 2021 - 2024
- 2:1; Distinction in two of three Preliminary Examination papers; LH Martin Prize (2022), Tatham Exhibition (2022), and Lincoln College Scholarship (2023).
- Selected papers: Comparative Government, International Security, Quantitative Economics.

Winchester College, Cambridge Pre-U Diploma — 2019 - 2021
- D1 (equivalent to or above A*) in English, Medieval History, Mathematics, and Further Mathematics.
- Four Headmaster's Commendations for outstanding grades.

Chinese International School, Years 7 - 11 – Hong Kong — 2014 - 2019
- Academic awards in English and History; Head's Commendation in each school year.

Professional Experience

Primavera Capital Group, Intern-Analyst – Hong Kong — July 2023 - Aug 2023
- Supported financial modelling, market research, and valuation; mapped and tracked AI-startup developments and funding opportunities.

PwC China, Summer Intern, Technology Consulting – Hong Kong — Aug 2022 - Sept 2022
- Produced presentations and voxel-rendered deliverable mock-ups for Web3 projects; delivered partner briefings on metaverse platforms.

Deloitte China, Foundation Intern – Hong Kong — July 2021 - Aug 2021
- Built a JavaScript mentor-matching tool, analysed programme activity, and identified delivery partners for the Young Professionals and Pass the Torch ESG programmes; wrote an 18-page digital-literacy report.

Squire Patton Boggs, Summer Intern – Hong Kong — Aug 2020 - Aug 2020
- Produced presentations, translated documents, drafted speeches, and researched online dispute resolution.

EFund Asset Management, Bond Analyst Intern – Hong Kong — July 2019 - Aug 2019
- Read, translated, and wrote emerging-market fixed-income research focused on Chinese corporate bonds; supported data collection and sell-side research analysis.

Additional Experience & Activities

Gatsby Computational Neuroscience Unit, UCL, Mathematics Bridging Programme — June 2026 - Aug 2026
- Full-time, in-person programme in applied mathematics and introductory theoretical neuroscience; calculus, linear algebra, ODEs, Fourier analysis, biophysics, networks, and neural coding.

Orion AI Governance Initiative, Policy Fellow — Apr 2025 - May 2025
- Collaborated with researchers at the Centre for the Governance of AI on a policy brief proposing minilateral mechanisms for structured access, cloud oversight, know-your-customer controls, and tiered access.

Lincoln College Junior Common Room, Website and ICT Officer – Oxford — Nov 2021 - June 2022
- Created and managed a website for the college's undergraduate community.

Oxford Strategy Group, Senior Consultant – Oxford — Oct 2021 - June 2022
- Led a three-person team on US and EU expansion strategy for a drone-software firm and client-acquisition strategy for a consulting-recruitment startup, using competitor, regulatory, and implementation analysis.

Selected distinctions, Debating and mathematics — 2018 - 2019
- Cambridge Schools Debating finalist; Asian Schools British Parliamentary semi-finalist, first break, and best under-16 speaker; Northeast Asian Mathematics Competition strategy award.

Selected Research & Projects

South Yorkshire industrial strategy project (LSE, four-person group) — 2026
- Analysed 1.25m- and 6.3m-row national datasets across 355 English local authorities using regularisation, clustering, and spatial econometrics; contributed to presentations for research and policy audiences.

Civil-war participation replication (LSE, sole-authored) — 2026
- Implemented survey-weighted multilevel logistic models in R, including random slopes, cross-level interactions, and variance-partitioning diagnostics.

2048 reinforcement-learning project (LSE, three-person group) — 2026
- Compared TD-afterstate and Q-learning agents across reward and exploration designs; 85/100 group mark.

Neural-data feature-selection project (LSE, three-person group) — 2026
- Individually benchmarked six feature-selection methods on 11,190-feature mouse frontal-cortex neural recordings from an IBL multisensory decision task (group mark: 76/100).

Skills & Interests

R: caret, xgboost, glmnet, lme4, WeMix, survey, fpp3; regression, machine learning, multilevel modelling, and time-series econometrics
Python: pandas, NumPy, scikit-learn, statsmodels, GeoPandas, PySAL; data analysis, machine learning, and spatial econometrics
Other: Excel financial modelling, JavaScript, PowerPoint; English, Cantonese, and Putonghua; interests in political economy, AI governance, and philosophical aesthetics
